Art Unit: 2157

1. Claims 1-13 are presenting for examination.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-13 rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. The address configuration table having different fields is in itself non-functional and thus lacks utility.

4. Claims 9 is a duplicate to claim 8.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

Art Unit: 2157

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-13 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2-12 of U.S. Patent No. 6,823,386. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent 481 substantially teaches the claimed limitations.

7. Claims 1-13 would be allowable upon receiving the terminal disclaimer.

7.1. The prior art of record does not teach an address configuration table for mapping a plurality of source devices in a source network to a single destination device in a destination network in which the table comprises a first address matching field matching the source network addresses of the source devices, a second address matching field equal to the source network address of the destination device, and a first address translation field equal to the destination network address of the destination device .

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
